OCETA / aboutREMIEDIATION / Canadian Brownfields Network (CBN) - Booth I339 & I341

OCETA is a private, not-for-profit corporation that supports the commercialization and market acceptance of innovative technologies and environmentally sustainable solutions through stakeholder consultation and the provision of business and technical services.

OCETA plays a key role in addressing the legacy of Brownfield sites in Canada by identifying barriers and solutions to remediation of contaminated sites and sustainable Brownfield redevelopment practices. The Remediation and Brownfield Services Division, assists in the development and dissemination of tools and resources for all stakeholders.

about REMIEDIATION

The **aboutREMIEDIATION (AR)** Web portal provides government agencies, developers, financial organizations, academia and consultants with relevant up-to-date news, announcements, events, tools, technologies and case studies. Users can access relevant information and innovative solutions to guide them through the remediation, reclamation and Brownfield redevelopment process.

Remediate, Reclaim, Redevelop, Revitalize
www.aboutREMIEDIATION.com

The **Canadian Brownfields Network (CBN)** is a national advocacy network that represents the interests of Brownfield practitioners and stakeholders who want to effect change and address the barriers associated with Brownfield redevelopment in Canada. The CBN is uniquely positioned as the enabling mechanism to implement the National Round Table on the Environment and Economy (NRTEE) recommendations to accelerate Brownfield redevelopment activities across Canada.

The CBN was founded by OCETA and others in response to recommendations in the NRTEE's National Brownfield Redevelopment Strategy for Canada. The CBN operates under an association-like structure with OCETA as one of the Executive Committee. OCETA has a further role providing management and administrative support.

Canada's Voice for Brownfield Redevelopment

AGAT Laboratories Ltd. - Booth I352 LUNCHEON SPONSOR

AGAT employs a wide range of experts to ensure each client's unique needs are met. These experts include:

- chemists
- biochemists
- occupational hygienists
- environmental scientists
- biologists
- microbiologists

Using state-of-the-art instrumentation these experts are able to provide each client with concise results to meet specific guidelines regarding contamination and remediation. AGAT's unique reporting system and database allows clients to easily interpret results and access them via the internet.

AGAT's mission statement is "Service Beyond Analysis". With a staff of diverse experts, state-of-the-art laboratories and client-focused reporting tools, AGAT achieves excellence in both quality of results and client satisfaction.

AIG Environmental® - Booth I354

Almost every industry has pollution exposure, making environmental insurance a core line of coverage that the standard lines client cannot risk being without.

With over 25 years of environmental liability experience, AIG Environmental® is at the forefront in the creation of insurance products that anticipate client needs. We have made environmental risk management our business longer than anyone in the industry. Most importantly, we support our products with services that respond to the clients' needs quickly, easily and effectively - whether analyzing exposures, providing quick price indications or offering reasonable premiums and broad coverage options.

For more information about our services and products please visit our website at www.aigenvironmental.com.

ALLU Group - Booth I229

ALLU manufactures specialty products for the field of environmental and earthmoving technology. Our product range consists of the ALLU

SM Processing Attachment, ALLU PM/PF Stabilization System, ALLU VP Compacting Plate, ALLU PG Pipe Grabber, ALLU AS Windrow Turner and OilQuick Coupler.

Our main product, the ALLU SM Processing Attachment scoops, screens and pulverizes in a single step operation. It utilizes its patented design of rotating discs with changeable hammers to screen and crush various types of difficult materials simultaneously, making it a cost-effective tool. The ALLU SM is available in 48 models for wheel loaders, excavators and skid steers. The ALLU SM grinds food waste, process animal mortalities, mix and aerates compost and process C&D.

ALS Environmental - Booth 1224

ALS Environmental, a division of the ALS Laboratory Group, provides environmental laboratory services that help consulting and engineering firms, industry, and governments around the world make informed decisions about their environmental projects.

ALS Environmental has 16 locations in Canada from Vancouver to Halifax including 5 locations in Ontario and 4 in Alberta to service the brownfield remediation projects. ALS's analytical capabilities include trace-level organic, inorganic, physical, microbiological, and toxicological analyses for more than 2000 parameters in sample types including water, seawater, soil, sediment, plant and animal tissue and air. For more information please contact ALS at 1-800-668-9878. www.alsglobal.com

AMEC Earth & Environmental Limited - Booth 1125

AMEC is an international engineering services company that designs, delivers and supports client assets for customers worldwide across the public and private sectors. AMEC employs people in more than 40 countries throughout North America, the United Kingdom and around the world. We are dedicated to the consistent development of industry-leading standards of excellence in earth and environmental consulting and engineering.

Since 2000, Engineering News Record magazine has ranked AMEC among the top International Design Firms according to. In 2004, the company was the top International Design Firm in the United States.

For more information, contact your local AMEC office, or visit www.amec.com

Biogenie S.R.D.C. - Booth 1029 SILVER SPONSOR

As it has been its core business since 1986, Biogenie S.R.D.C. Inc. provides services pertaining exclusively to site environmental remediation by offering integrated solutions (as general contractor) or tailored services for individual aspects of site management, from site preliminary or exhaustive investigation and assessment, to process

design and work supervision and to providing assistance through permit request and expert opinion. One of Biogenie's known strengths lies in the inception of flexible, site-specific remedial designs and in its ability to rapidly implement remedial action plans. Biogenie designs and implements optimal solutions for any type of contamination (i.e. hydrocarbons, creosote, chlorinated solvents, metals). The integrated approach to contaminated sites embraced by Biogenies provides the group with a unique ability to offer guaranteed (or performance based) remedial solutions, which is greatly appreciated in industrial, real estate and public circles. Biogenie proudly serves public and private customers including government as well as major petroleum, industrial, real estate and utility companies throughout North America and Western Europe.

The British Consul-General
Toronto

The British Consulate-General in Toronto - No Booth SILVER SPONSOR

Our team of experienced trade professionals across the country can help Canadian companies seeking products and services from the UK. We provide business opportunities, expert trade advice and support to Canadian based companies wishing to grow their business overseas.

Caduceon Environmental Laboratories - Booth 1329

The major focus at Caduceon is environmental testing and the laboratory offers services for a complete range of environmental samples. This includes solid wastes, effluents, receiving water, surface and ground waters, soils, sediments, air emissions and airborne particulates. We offer testing in the following disciplines:

- Organic chemistry, including Petroleum Hydrocarbons, PCB's, base/neutral and extractables, herbicides and pesticides and volatile organic compounds;
- Inorganic analysis, including physical properties such as pH, colour, etc., anions, nutrients and metals;
- Microbiological analysis of potable and non-potable groundwater, surface water, wastewater treatment sources and other applicable sample matrices.

CANADA LANDS COMPANY
SOCIÉTÉ IMMOBILIÈRE DU CANADA

Canada Lands Company - No Booth BRONZE SPONSOR

Canada Lands Company is a self-financing, federal commercial Crown corporation with the Government of Canada serving as its sole shareholder. The company was created to optimize the financial and community value of surplus strategic government properties. It operates at arms-length from the government and purchases properties at market value from various federal departments, agencies and Crown corporations and revitalizes and reintegrates the local community. With each property it acquires, the company undertakes redevelopment activities as rezoning and planning, site servicing and then holds and manages them or else sells them to the private sector. www.clc.ca

Canada Mortgage and Housing Corporation (CMHC) - Booth 1347
BROWNIE AWARDS SPONSOR

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for over 60 years. Together with other housing stakeholders, we help ensure that Canada maintains one of the best housing systems in the world. We are committed to helping Canadians access a wide choice of quality, affordable homes, while making vibrant, healthy communities and cities a reality across the country.

CMHC Call Centre: 1-800-668-2642
 www.cmhc.ca

Canadian Urban Institute - Booth 1327

The Canadian Urban Institute (CUI) is Canada's leading applied urban policy institute with a mission to identify, develop and deliver policy and planning solutions to enable urban regions to thrive and prosper.

The Institute's work is dedicated to building strong communities and equitable, sustainable and competitive urban regions. Our mandate is to:

- Enhance policymaking and management of urban areas.
- Facilitate the exchange of information between urban areas within Canada and internationally.
- Foster cooperative approaches to urban issues.
- Identify, track and raise awareness of significant emerging urban issues.
- Improve the outcomes, systems and participation in urban development decision-making.
- Celebrate and reward urban leadership and innovation.
- Enhance the skills and competencies of urban leaders and practitioners.
- Promote the understanding and development of urban regionalism.
- Champion local solutions to global challenges.
- Value and promote citizenship.

Cement Association of Canada - Booth 1131
GOLD SPONSOR

The Cement Association of Canada represents 100% of the Canadian cement producers and is the national and regional voice of Canada's cement industry. Its members include nine companies with clinker and cement manufacturing facilities, granulators, grinding facilities and cement terminals from coast to coast. The CAC's mandate is to increase and expand appropriate use of cement and concrete in Canada. Through partnerships in marketing, public affairs, engineering, education and technical support, the Cement Association of Canada seeks to advance the contributions that cement and concrete make to vibrant communities, a healthy/sustainable environment and a competitive economy.

CETCO Liquid Booth Company - Booth 1122

LIQUID BOOT® is a spray-applied, impermeable and reliable vapor intrusion solution installed under buildings to prevent subsurface vapors from migrating into structures. With more than 25 years of proven performance and millions of square feet already in place, LIQUID BOOT® is widely used for new construction and for the redevelopment of former industrial sites, landfills, and other 'Brownfields' where soil contamination must be mitigated. The combination of the unsurpassed quality of LIQUID BOOT®, along with the technical expertise of our in-house engineers, has lead CETCO Liquid Boot Company to the forefront of Brownfield redevelopment.

Decommissioning Consulting Services Ltd. - Booth 1353

DCS is a consulting engineering company that specializes in the assessment and preparation of large-scale brownfield sites for redevelopment. Founded in 1990, we provide environmental engineering and associated services to clients throughout Canada and internationally from our Toronto, Ottawa and Sydney offices. Our staff of more than 40 engineers, geoscientists, technical and support personnel includes specialists in: site investigations, facility assessment and auditing, civil, geological, mining and geotechnical engineering and hydrogeology, chemical and process engineering and biotreatment, construction management and supervision, mould, asbestos and hazardous materials management, decommissioning and demolition, soil and groundwater remediation, industrial hygiene, waste management, ordnance management and demining, strategic planning and environmental systems implementation. We have extensive expertise in the application of environmental liabilities evaluation, risk assessment and environmental risk management to site preparation and industrial and institutional site decommissioning, restoration and redevelopment.

Denmark – Green Nation - Booth 1223
BRONZE SPONSOR

As a country, Denmark has had various international surveys rating it among the happiest, most peaceful and most globalised; with one of the highest standards of living.

A Green Nation

"Green", in both the visual and eco-friendly sense, is the word that best describes the Danish landscape. Decades ago, Denmark recognised the need to protect the environment and to promote and safeguard sustainable development. This in turn has given the country a useful lead in tackling issues like sustainable generation of energy, energy efficiency, district heating, waste water treatment and waste management. Today, green technology is one of Denmark's biggest exports. The country has well-established programmes of research and numerous companies with expertise and production capability in the field of sustainable technologies. Denmark is thus well prepared for meeting the challenges of climate change, and welcomes opportunities for partnership in the fight against global warming.

ECO Canada -Booth 1129

ECO Canada develops programs that help individuals build meaningful environmental careers, provides employers with resources to find and keep the best environmental

practitioners, and informs educators and governments of employment trends to ensure the ongoing prosperity of this growing sector.

The organization offers a suite of resources designed to meet the professional needs of this rapidly growing industry, including the largest environmental online job board in Canada, certification for environmental practitioners, and a wage-subsidy internship program.

EcoLog Environmental Risk Information Service Ltd. - Booth 1228

(ERIS) is Canada's leading provider of property-related environmental risk information. ERIS has forged a

reputation for being an accurate, affordable, and efficient service for searches on historic and current records related to environmental conditions of a property. ERIS alerts owners and environmental professionals of possible environmental problems on a specific site and its neighbouring area utilizing a turnkey solution to summarizing environmental information using database reports and synchronous mapping technology. ERIS red flags potential "trouble spots" before a Phase I Environmental Site Assessment begins. Clients get a customized and manually verified map showing their property with records clearly highlighted. The ERIS system electronically accesses over 458 federal, provincial, and private sector databases containing over 3.9 million current and historical environment records to identify potential environmental threats on Canadian properties.

ENVIRON - Booth 1222 SILVER SPONSOR

An international environmental and health sciences consultancy,

ENVIRON partners with clients to assess and manage the potential environmental, energy, and health issues associated with their activities and products. Decision makers rely on us as they strive to reduce or eliminate health and environmental impacts throughout their business life cycles. Whether responding to existing challenges, implementing measures to prevent future liabilities, or seeking sustainability strategies, clients around the world benefit from our blend of universally high technical and scientific skills and knowledge of local requirements and practices.

FCM Centre for Sustainable Community Development - Booth 1123 GOLD SPONSOR

The FCM Centre for Sustainable Community Development (CSCD) offers resources for municipal governments to achieve their sustainable development goals. CSCD's range of financial resources, expertise and services supports a growing network of municipal governments pursuing sustainable community development projects. FCM's Green Municipal Fund (GMF) provides financing and knowledge to support the development of communities that are more environmentally, socially and economically sustainable. GMF funding is complemented by a Capacity Building program, which shares the knowledge and experience gained by municipal leaders through GMF-funded studies and projects. It informs, inspires and supports municipal governments to implement sustainable community development projects and practices.

Franz Environmental Inc. - Booth 1337

Franz Environmental Inc. is an environmental and engineering consulting firm specializing in Environmental Site Assessments (ESAs) and remediation of contaminant impacts. Further, our focus is on the monitoring, risk assessment and remediation of groundwater, soils, surface, water and sediments for private industrial corporations, government, and other engineering and consulting firms. We also provide our expertise to law firms, banks and insurance companies.

Visit us at - www.FranzEnvironmental.com
Phone: 1 (905) 614-1978

GlobalTox International Consultants - Booth 1231 BRONZE SPONSOR

GlobalTox is a privately owned Canadian corporation providing services in human and environmental toxicology and risk assessment for contaminated (brownfield) sites. Our staff include senior toxicologists with American Board of Toxicology and EUROTOX credentials and extensive public and private sector experience in environmental toxicology. Our clients include federal, provincial and municipal governments, land developers, manufacturers and law firms throughout Ontario, Canada and the United States.

Our familiarity with human health and ecological toxicology has allowed us to complete numerous Risk Assessments via O. Reg. 153/04 and to provide review services to the MOE via a vendor of record process since 2003.

Golder Associates Ltd. - Booth 1348 / 1349
GOLD SPONSOR

At Golder Associates we strive to be the most respected global group specializing in ground engineering and environmental services. Employee owned since our formation in 1960, we have created a unique culture with pride in ownership, resulting in long-term organizational stability. Golder professionals take the time to build an understanding of client needs and of the specific environments in which they operate. We continue to expand our technical capabilities and have experienced steady growth, now employing over 5,500 people who operate from more than 150 offices located throughout Africa, Asia, Australasia, Europe, North America and South America.

Gowling Lafleur Henderson LLP

Gowling Lefleur Henderson LLP - Booth 1346
SILVER SPONSOR

Gowlings Environmental Law Group delivers practical advice and representation to help clients address environmental concerns. Furthermore, Gowlings combines the strength and flexibility of a full-service national law firm with the expertise and specialization of a boutique environmental practice. Members of the Group are internationally recognized for their expertise in the interpretation and application of the law with respect to environmental matters. Four partners have been certified as Specialists in Environmental Law by the Law Society of Upper Canada — a designation attributed exclusively to those professionals who have met established standards of experience and knowledge, and maintained exemplary standards of professional practice. The Group also has significant experience in the related areas of natural resources, energy, infrastructure, real estate, transportation and aboriginal law.

Jacques Whitford Limited - Booth 1351
SILVER SPONSOR

Jacques Whitford is a multidisciplinary engineering, environmental, sustainability and earth sciences firm providing integrated and sustainable solutions in Canada, the USA, and overseas. Since its inception in 1972, it has enjoyed consistent professional recognition, financial success and growth. We are an employee-owned Canadian company that currently employs over 1800 people in more than 45 Canadian, US and international offices, including all Canadian Provinces. Our key client sectors include: energy and utilities, real estate and finance, governments at all levels, resources, commercial development, industrial manufacturing, transportation and insurance.

Jacques Whitford's services include: environmental site assessment and remediation, human health and ecological risk assessment, environmental planning and permitting, facility assessment and

renewal, sustainability planning, indoor environments, geotechnical and materials engineering, air quality and noise management, biophysical and ecological sciences, water resources, environmental process engineering, waste management planning, environmental, health, safety and risk management systems and other leading edge services focused on meeting challenges in the natural and built environment.

www.jacqueswhitford.com

Jagger Hims - Booth 1351

Jagger Hims Limited is a Canadian-owned consulting engineering firm incorporated in 1987 to provide specialized consulting services in the earth and environmental sciences. Our head office is located in Newmarket, with branch offices in St. Catharines, Windsor, Peterborough, Collingwood, Brantford, London and Detroit. Our specialized team of professional engineers and geoscientist provide consulting services in the fields of environmental site assessments; contaminated lands remediation and re-development; geotechnical engineering; municipal water supply evaluation and development; as well as, landfill site selection, design and monitoring. Jagger Hims Limited is committed to providing our clients with quality solutions that are cost effective and protective of the environment.

Lafarge North America Inc. - Booth 1344
SILVER SPONSOR

Lafarge North America is the largest diversified construction materials company and supplier of cement, aggregates and concrete, and other materials for residential, commercial, institutional and public works construction in the United States and Canada. Lafarge North America is part of the Lafarge Group, a world leader in building materials that is active in 75 countries, and employs more than 75,000 people. With over twenty types of cements and blends, as well as slag, fly ash, CKD, asphalt, aggregates and ready-mixed concrete, Lafarge provides innovative solutions for customers who include ready-mix producers, concrete product manufacturers, contractors, masons, builders and municipal authorities.

Land Science Technologies - Booth 1332

Land Science Technologies (LST)[™] is focused on the development and commercialization of advanced and environmentally sound technologies for sustainable development. LST is dedicated to providing the engineering, environmental and real estate industries with cost-effective and leading edge solutions. LST is a division of Regenesys, Inc., a global leader in remediation technologies since 1994. www.landsciencetech.com

Maxxam Analytics Inc. - Booth 1333

Over the past 30 years, Maxxam Analytics has grown into one of the largest privately owned Analytical Laboratory Networks in North America, becoming a leader in scientific expertise and innovation. We provide analytical solutions that meet and exceed the constantly changing environmental expectations of regulators, environmental consulting firms, industrial and petrochemical companies. With a workforce of over 1,300 skilled and experienced scientists, technologists and service staff located throughout our national network of 26 laboratory and service locations across Canada, we offer a comprehensive range of accredited tests in routine and specialized analysis of water, soil, waste, air and biota.

MMM Group Limited - Booth 1128

MMM Group Limited has taken a leadership role in the planning, design and implementation of sustainable redevelopment programs at brownfield sites as interest in urban infill/intensification and utilization of neglected lands has grown among community planners and developers. For more than 50 years, a primary focus of the firm has been to provide planning and engineering expertise to the property development industry. With a multidisciplinary staff of 1,100, we have the in-house capability to provide the full range of professional services to support all phases of a sustainable brownfield redevelopment project from strategic planning through to site occupancy.

Netherlands Consulate General - Booth 1225, 1324 SUPPORTING SPONSOR

The Dutch government has four missions in Canada: Ottawa, Montreal, Toronto and Vancouver. Each mission has an Economic and Commercial Department. The Consulate General in Toronto has strong commitment to working with Canadian counterparts in finding sustainable solutions in the areas of transportation, construction, energy and environmental issues, including soil remediation. The Consulate General promotes these sectors by organizing seminars, booths at tradeshows, workshops, trade missions and inviting speakers from The Netherlands to participate in workshops and conferences in Canada. The Consulate General offers Dutch companies the possibility to present themselves at the Netherlands booth.

Ontario Centres of Excellence - Booth 1342 SILVER SPONSOR

The Ontario Centres of Excellence is the pre-eminent research-to-commercialization vehicle in Ontario.

We take ideas to income. Created in response to Ontario's most critical competitive challenges, we facilitate economic growth through support for industrially relevant R&D, the opening of new market opportunities and the commercialization of leading edge discovery. We build strong industry and academic relationships. And, we stimulate knowledge transfer through the development of bright minds, moving their skills to the market.

Values

Partnership: We believe in the power of teamwork and building effective partnerships both internally and externally. The result is a culture based on transparency and the sharing of information.

Trust and Respect: We trust and respect our staff, clients and stakeholders and we hold ourselves to the highest standards of professionalism.

Flexibility and Agility: We believe in serving clients and partners according to their needs and timelines. We identify with the entrepreneurs we work with.

Risk-taking: We are in the "new ideas" business. We value creativity and believe in life-long learning. We accept the risks associated with furthering development of innovative ideas and people.

Accountability: We are accountable for our individual and collective decisions and actions as they impact our relationships and the performance of the organization.

Positive Work Environment: We support diversity and believe that OCE functions best when staff is like-minded – not necessarily alike. And, we support programs that facilitate work-life balance.

Government of Ontario – Ministry of Municipal Affairs and Housing - Ontario Pavillion Booths 1031, 1033, 1130, 1132 GOLD SPONSOR

The Office of the Brownfields Coordinator is located within the Ministry of Municipal Affairs and Housing. Responsibilities include: coordinating provincial action on brownfields; providing strategic policy development and facilitation across provincial ministries; and providing one-window access to the province for municipalities and stakeholders interested in brownfield redevelopment.

ONTARIO MUNICIPALITIES - ONTARIO PAVILLION

City of Hamilton

Hamilton is located at the head of Lake Ontario, between Niagara Falls and Toronto. According to the 2001 census, Hamilton's population is 490,268 making it the eighth largest city in Canada. Demonstrating the city's diversity, nearly one-quarter of the metropolitan area population of Hamilton is foreign-born. This makes Hamilton the Canadian city with the third highest proportion of foreign-born citizens after Toronto (44%) and Vancouver (38%).

City of Kingston

The City of Kingston offers their REAP program in support of community improvement plans to provide qualified developers with financial incentives to assist in the cost of site clean-up and development on sites that are defined as brownfields. REAP stands for Remediation for the Environment and the People.

City of Kitchener

The City of Kitchener is a dynamic mid-sized Canadian City situated approximately 120 kilometres west of Toronto. Within the economic region known as Canada's Technology Triangle, Kitchener is a major City with a small town appeal. The City once known mainly for Oktoberfest has become a diverse and creative urban centre that is attracting talent from across the country. The area has a growing high technology sector and is a magnet for professionals and entrepreneurs who benefit from the superior quality of life.

Waterloo Region

In Waterloo Region, our history as a manufacturing centre has increased the potential for brownfields in prime locations throughout our cities and towns. With provincial and regional growth management policies that encourage the compact development of existing "built-up" areas in order to make better use of infrastructure and services, brownfield clean-up and redevelopment offers a key opportunity for reurbanization to create a more transit-supportive, sustainable and healthy community.

The Region of Waterloo and its Area Municipal Partners are dedicated to the promotion of brownfield clean-up and redevelopment.

Please visit www.region.waterloo.on.ca for more details.

PLANTPRODUCTS

we're putting our sixty years experience in nutrient delivery to work in industrial applications, with a focus on bioremediation.

For those in the field of environmental remediation, the marketplace is full of companies that want to be your supplier. While products are important to success, so is the advice and expertise of people who take the time to understand your business and your challenges.

That's where Plant Products Industrial Solutions stands out. We're not just a supplier. We're a committed partner in the success of your projects.

Being a fresh face in the industrial solutions field, we knew we had to offer something different. Plant Products' proprietary line of fertilizers, surfactants and inoculants provide a range of high-performing solutions that's second to none. We also have a team of technical representatives and distribution partners who can bring the benefits of our approach to your projects - enhancing outcomes and your bottom line.

Pottinger Gaherty Environmental Consultants - Booth 1023

Pottinger Gaherty Environmental Consultants (PGL) provides clients with excellence in project process and clarity in communication. Solving & Simplifying. Our work programs incorporate only intelligent, reasonable, and required steps and solutions and our clients receive regular updates on project progress with reporting that is clear, concise and useful.

Providing high levels of customization and attention to each and every project and client, we offer technical, regulatory and business expertise in contaminated site management, environmental impact assessment, planning & sustainability, air quality management, and hazardous material management services.

Providing best results by merging the practical with an intelligent, cost-effective approach, our team of more than 70 people located in BC and Ontario serve a portfolio of clients spread nationwide, across all industries and market sectors.

PURVES REDMOND
CLIENT FOCUSED RISK SOLUTIONS

Purves Redmond Limited - Booth 1330

Purves Redmond Limited, established in 1959, is a specialized risk advisory and brokerage firm. We offer independent risk financing/ insurance advice and placement as well as strategic risk management consulting services to senior managers of organizations that must contend with complex risk issues.

Developing and implementing an effective environmental risk financing program requires the focused efforts of a multi-disciplinary team of professionals with experience in the legal, engineering, financial, real estate and insurance issues of a contaminated site. We work exclusively on behalf of our clients and we work closely with their advisors to develop the optimum solutions to environmental issues.

Purves Redmond Limited can directly access and place specialty insurance and alternative risk financing programs to assist clients in developing a financial guarantee and cost cap of their environmental liabilities on an individual size or portfolio of sites.

Revitalization Institute at Seneca

Seneca College - The Revitalization Institute - Booth 1230 GOLD SPONSOR

The global secretariat for Revitalization Institute is now at Seneca College, as one of Canada's leading post-secondary institutions assumes leadership in the field of restorative development as detailed by Storm Cunningham.

Storm will join Seneca for four weeks annually as a distinguished visiting professor providing leadership on community revitalization and natural resources restoration, as well as faculty and student consultation.

Revitalization Institute at Seneca College is the hub of a global network of colleges and universities, advancing:

- Restorative development research;
- Restorative development curriculum;
- Restorative development community outreach by member academic institutions in their own region.

SGS -Environmental Services - Booth 1323

SGS is the world's leading inspection, testing and verification company with over 50,000 employees and 1000 offices and laboratories worldwide. We are a recognised global leader in providing defensible analytical data with a superior level of quality, services and expertise.

With 4 laboratories in Canada and 2 laboratories in the United States, SGS Environmental Services is well positioned across North America offering clients with state-of-the-art laboratory facilities, knowledgeable project specialists, customised data reporting and fast turn around times backed by our highest ranking accreditations. This level of excellence together with localised support provides our clients with a complete service approach within budget.

Swedish Trade Council - 1322 SUPPORTING SPONSOR

Swedish Trade Council's main task is to make it easier for Swedish companies to grow internationally. We do this by having a presence locally throughout the world and being close to companies in Sweden. On the basis of what our clients want, we provide everything from strategic advice to practical help.

The Swedish Trade Council operates in more than 50 countries and has approximately 500 employees, of whom 400 work outside Sweden. We have about 60 offices in 50 countries and we cover more than 100 countries through partners and networks. We are owned jointly by the state and private business.

SymbioCity

SymbioCity promotes holistic and sustainable urban development – finding potential synergies in urban functions and unlocking their efficiency and profitability.

SymbioCity is the trademark that reflects all knowledge and experience in regard to the Swedish approach to sustainability. Several hundred Swedish consultants, contractors and system suppliers are organised in various networks, dedicated to spreading the vision of sustainable urbanism and making the distance to implementation as short as possible.

Envac AB

Envac is the global market leader in automated waste collection. We develop and sell underground network systems for transportation of municipal and commercial waste. With the Envac solution the collection and transportation of waste is fully automated, safe and environmentally advantageous. The installation of an Envac system leads to a drastic reduction of road transportation of waste, improved hygiene and enhanced occupational health and safety standards. The Envac waste collection system supports source separation.

Terrafix Environmental Technology Inc - Booth 1350

"Terrafix Environmental Technology Inc. is Canada's leading Geosynthetics contractor specializing in the installation of Spray-on Gas-vapor barrier systems.

Terrafix has been involved in Brownfield developments in Canada for over ten years.

Terrafix uses state-of-the-art technologies to install 100% verifiable barrier and venting systems.

Recent successful Brownfield projects completed in Canada are:

- Distribution Centre – Surrey, B.C., installed in 2008.
- Child care facility - Vancouver, B.C., installed in 2008.
- Durham Consolidated Courthouse, Oshawa, Ontario, 2007–2008.
- Commercial Development, Kitchener, Ontario, 2007 – 2008.

Terrafix is Canada's largest certified applicator of Cetco/Liquid Boot® products.

For further information contact Mr. Blu Alexander at (416) 674-0363, extension 222."

TEDCO - No Booth GOLD SPONSOR

The City of Toronto Economic Development Corporation (TEDCO) is a wholly owned subsidiary of the City of Toronto but operates as an arms length corporation. As such TEDCO is completely self-financing.

TEDCO is strategically aligned with the City's Economic Development Division and works to advance various elements of the City's Economic Development Strategy, including the preservation of employment lands, redevelopment of brownfield sites and underutilized lands, sustainable development, excellence in design, and job creation.

TEDCO was incorporated in 1986 as an Economic Development Corporation (EDC) or Urban Development Corporation (UDC) based upon the successful experience of similar corporations in the United States, the UK and elsewhere in Europe. Provincial legislation was passed to allow the City of Toronto to create TEDCO as a company under the Ontario Business Corporations Act.

Terrasan Environmental Solutions Inc. - Booth 1025

Terrasan is Canada's predominant Brownfield and Urban Renewal Developers. The Firm is active in all aspects of Brownfield Redevelopment

and has taken a lead role in a variety of brownfield and impaired land redevelopments. The Firm determines how to best design the Site so it can add to the vitality of each Community. From there, Terrasan starts with the economic studies, and then moves through the complex soil remediation process, zoning, and full construction to bring about vibrant new residential and mixed use commercial communities.

Terrasan has significant investments in waterfront projects, infill projects, mixed use projects, and has created a number of sustainable redevelopment communities in Toronto, Collingwood, Welland, and Montreal area. Of interest, is Terrasan's new project in Lindsay Ontario whereas, it acquired a 62 acre impaired Site and is in the process to bring about a stunning mixed use setting including Prestige Industrial, Residential, and a new Research & Development Campus. Terrasan brings vibrant new Communities to what once was old, empty, or derelict real estate. Terrasan works with municipalities, investment bankers, realty owners, Heavy Industrial land Owners, and financial institutions throughout Canada. For more information see: www.terrasan.com

Trow Associates Inc. - Booth 1328

Founded in 1957, Trow has grown into one of Canada's largest engineering and consulting firms. With offices across Canada, the U.S. and internationally, and with projects around the globe, Trow offers clients in both the private and public sectors a full range of services provided by a dedicated team of approximately 2,000, specializing in Environmental, Building Science, GeoScience, Infrastructure and Materials Quality Management services. Selected as a winner of Canada's 50 Best Managed Companies Program, Trow provides integrated solutions to the commercial, energy, industrial, infrastructure, institutional, residential and transportation sectors. Today, the Company continues to enjoy dynamic growth on a global scale.

Trow's Environmental Division specializes in Environmental Site Assessments; Indoor Air Quality and Industrial Hygiene; Remediation and Brownfield Redevelopment; Designated Substances and Hazardous Materials; Hydrogeology and Risk Based Assessments.

**Weir Foulds LLP - No Booth
SILVER SPONSOR**

Since before Canada was a nation, the lawyers of WeirFoulds have been proud to serve the needs of discriminating clients with their most difficult and complex matters. We are, and aspire to be, the firm of choice for clients with exceptionally challenging problems within our chosen practice areas. This focus is reflected in our lawyers. An impressively large percentage of our partnership is comprised of people who are recognized by their peers as leaders in their fields.

**XCG Consultants Ltd. - Booth 1343
BRONZE SPONSOR**

Founded in 1990, and built on a solid foundation of senior engineering professionals, XCG offers a comprehensive range of environmental consulting services. Our success is a direct result of the strength of our employees; as XCG continues to grow and implement leading edge technology in the field of environmental engineering consulting. XCG has earned a reputation for providing innovative and cost-effective approaches to contamination issues associated with the redevelopment of former industrial properties. XCG has taken numerous Brownfield sites all the way from the early Phase I Environmental Site Assessment stage, through complete cleanup, zone change, and into redevelopment.

XL Insurance Company Limited - Booth 1124

The XL Insurance companies specialize in tailored environmental products for Property Owners, Manufacturers, Waste Site operators, and the Environmental and Remediation Construction and Services Industry including Brownfield redevelopment. As members of the XL Capital group, we also offer property, casualty, professional and specialty coverages and related services, as well as large capacity and financial strength. Visit us at www.xlinsurance.com

**Zurich Insurance Company -
Booth 1233
BRONZE SPONSOR**

Few insurers can match Zurich's technical knowledge, financial strength and commitment to environmental liability. Our team of underwriting, engineering, claims and risk management specialists allow us to combine insurance expertise with the skills of geologists, biologists, engineers, chemists, and environmental attorneys. A well-researched environmental liability program will help owners and developers to achieve the right balance between risk and cost. Contact your Zurich broker or 416.586.2953 for more information on how to tailor environmental coverage to meet your needs.
