

Jeanette M. Southwood, M.A.Sc., P.Eng., QPESA, QPRA

A Principal at Golder Associates Ltd., Jeanette is a registered Professional Engineer in the Province of Ontario, and a Qualified Person for Risk Assessment and Environmental Site Assessment as defined in Ontario Regulation 153/04 (O. Reg. 153/04). For more than 19 years, she has directed and participated in numerous projects related to the sustainable revitalization of urban communities, including contaminated sites and brownfields redevelopment, strategy development, risk assessments, environmental site assessments, risk management plans, as well as database and information management system development for a wide variety of clients.

Selected examples of Jeanette's experience include: co-author of draft technical guidance documents for government agencies; member of the Canadian Standards Association (CSA) Environmental Risk Assessment Technical Committee; reviewer for the Ontario Ministry of the Environment (MOE); collaborator with the Canadian Environmental Modelling Centre; and almost two decades of speaking at conferences and workshops, lecturing at universities, and leading training sessions on many topics. In 1997, she received the Professional Engineers Ontario (PEO) Young Engineer Award and has since received several other awards and recognition.

Currently, Jeanette is a member of the: Canadian Brownfields Network; Society of Environmental Toxicology and Chemistry (SETAC); National Brownfield Association-Ontario Chapter; Ontario Centre for Environmental Technological Advancement (OCETA) Service Station Redevelopment Framework Advisory Team; and the University of Toronto Advisory Board for the Master of Environmental Science Program. She chairs the Awards Committee for Professional Engineers Ontario. Since 2001, she has been listed in the *Women in the Lead* Directory, a national Canadian directory sponsored by the HSBC Bank Canada and the Ivey School of Business at The University of Western Ontario. At Golder, Jeanette leads the Canadian and Global Brownfields Initiative teams, and is a member of Golder's International Remediation and International Risk teams.
